

EQ-i 2.0
assess. predict. perform.

EQi2.0® & EQ360® Certification Workshop

(This program is presented with the approval and accredited by Multi-Health Systems, Inc. www.mhs.com/ei)

What is Emotional Intelligence?

Emotional Intelligence is the set of social, emotional and personal abilities which enable us to cope highly effectively with daily demands and pressures. There is increasing evidence that these abilities are needed more in today's society and that they distinguish both the high performers in the workplace and individuals who feel most satisfied with life.

Emotional Intelligence (EI) has practical applications, making a real difference in helping individuals improve emotional, personal and social competence. These benefits transcend across business, relationships and life itself.

Why Certification in the BarOn EQ-I 2.0 and the EQ-I 360?

It is the most scientifically validated measure of emotional intelligence in the world.

General:

The EQ-i Certification Workshop will prepare you to administer, interpret and provide feedback on EQ-i results. This intense two day workshop is similar to other certification workshops - e.g. the Myers Briggs Type Indicator® qualification - in that the pace is quick and is based on the assumption that you will have completed the pre-work.

Essential Pre-Programme Work:

Once you have registered for the programme you will be sent the EQ Edge and instructions for completion of E-Learning modules. The E-Learning will take approximately 1.5 hours.

You will need to complete the EQ-i questionnaire in advance of the workshop.

Programme Benefits:

- Obtain a qualification certificate to purchase and use BarOn EQ-I 2.0 with your clients.
- Be qualified to administer the EQ-I 360 to individuals and amongst teams.
- Become effective at interpreting EQ-i results, in giving feedback in individual & group settings.
- Be qualified to use EQ-I 2.0 in coaching and leadership settings.
- Learn how to use the EQ-I 2.0 in a recruitment and selection environment.

Course Facilitator:

Anne Hennessy, Occupational Psychologist with Vitae Consulting, will facilitate the 2 day workshop. Anne is an experienced trainer of psychometric qualifying programmes. In her capacity as an associate consultant for Oxford Psychologists Press (OPP) she delivers qualifying workshops in the MBTI Step I, MBTI Step II and the 16pf. She also runs the Level B programme recognised by the British Psychological Society.

In house or 1:1 programmes can be run on request and additional dates made available.
